The Executive MBA in “Management of Technology” - MoT

Objectives	<ul style="list-style-type: none"> • To develop and stimulate entrepreneurship and intrapreneurship competencies; • To ensure success in innovation by fostering a multidisciplinary approach to the conception, industrialization and commercialization of products or services; • To provide insights into the constraints and interactions within the technological, business, international and social environments
Program	<p>The program is made up of three distinctive but complementary parts:</p> <ol style="list-style-type: none"> 1. Training at the Ecole des HEC of the University of Lausanne and the Ecole Polytechnique Fédérale of Lausanne, (<i>September 2006 to May 2007</i>) 2. Training at the University of Texas in Austin, USA (<i>June - July 2007</i>) 3. Practical work within a company (<i>August to November 2007</i>) <p>The training in Lausanne focuses on:</p> <ul style="list-style-type: none"> • Management and Entrepreneurship • Technology and Innovation <p>The teaching is based on a concrete, pragmatic approach with extensive use of case studies. It also includes group work for the conception, development and commercialization of new products, and more particularly the creation and growth of new ventures by teams.</p> <p>The training period at the University of Texas provides a foreign perspective on new ventures as well as additional managerial competencies.</p> <p>The practical part of the program consists of project work performed usually in pairs within a corporation or a new venture. The individual or the pair, usually made up of an engineer and a manager, conducts a new venture project that must be of value to the hosting entity or to potential investors.</p>
